

Welcome to Oban

www.obanharbour.scot

Oban is the perfect place to stop off and replenish, be it a great meal at the marina, a crew change at the pontoons or a safe place to leave your boat on a mooring. Planning a safe route through the busy harbour to avoid other traffic is essential to your safety and enjoyment.

Notice to Mariners

Relevant Notice to Mariners, more information and the full Code of Practice for operating in Oban Bay can be found online at www.obanharbour.scot.

Speed and Wash

There is a voluntary speed limit of 10 knots in the outer part of the bay and 6 knots east of Dunollie Lt and the Sgeir Rathaid Reef to keep wash to a minimum.

Commercial Traffic

Oban's piers host many large cruise, fishing and aquaculture vessels. Additionally Oban is a key hub for the lifeline ferry service to the isles.

VHF Channel 12

Vessels over 20 meters entering or departing Oban bay will broadcast on VHF channel 12, at a position approximately 1 mile west of Maiden Island on their entrance and immediately before departure. Use this information to plan your route through Oban Bay.

Large Vessel Channel

There is a designated large vessel channel at the north entrance where IRPCS Rule 9 (narrow channels) applies.

Manoeuvrability

Large vessels take hundreds of meters to significantly adjust their course and speed. Consequently large vessels have right of way over all small vessels of less than 20m in length, in the whole of Oban Bay.

Windage

Large vessels, especially ferries, have huge windage and can make a significant amount of leeway especially at slow speeds. A vessel's direction of travel can be quite different to the vessel's heading, especially in windy conditions. This is why ferries in particular will try to keep their speed up, to between 8 and 10 knots, in the narrow part of the north entrance to avoid being blown onto the lee shore.

What can you do?

Comply with the International Regulations for Preventing Collisions at Sea (COLREGS).

Planning your route

Wherever possible enter and depart the north entrance of Oban Bay to the west/south side of the large vessel channel **following the recommended small vessel route**.

Small vessels should only use the large vessel channel when this will not impede the passage of a large vessel. It is best to avoid the area north/east of the large vessel channel as a large vessel's sterns will swing towards this area when they turn.

Crossing of the large vessel channel should be at 90° and made at the shortest point that is safe to do so.

Lookout & The 3 Minute Rule

Be alert. Never assume you have been seen. It's important to maintain a good all round lookout at all times.

Think 3 minutes ahead, ensuring your spatial awareness extends this far. Visualise where your vessel and all the vessels around you will be in 3 minutes time. For a vessel moving at 10 knots this is half a nautical mile or almost the entire width of the bay. Large vessels are planning a safe route this far ahead.

Have your engine ready for immediate use when entering or leaving Oban Bay, to ensure you can keep the designated large vessel channel clear.

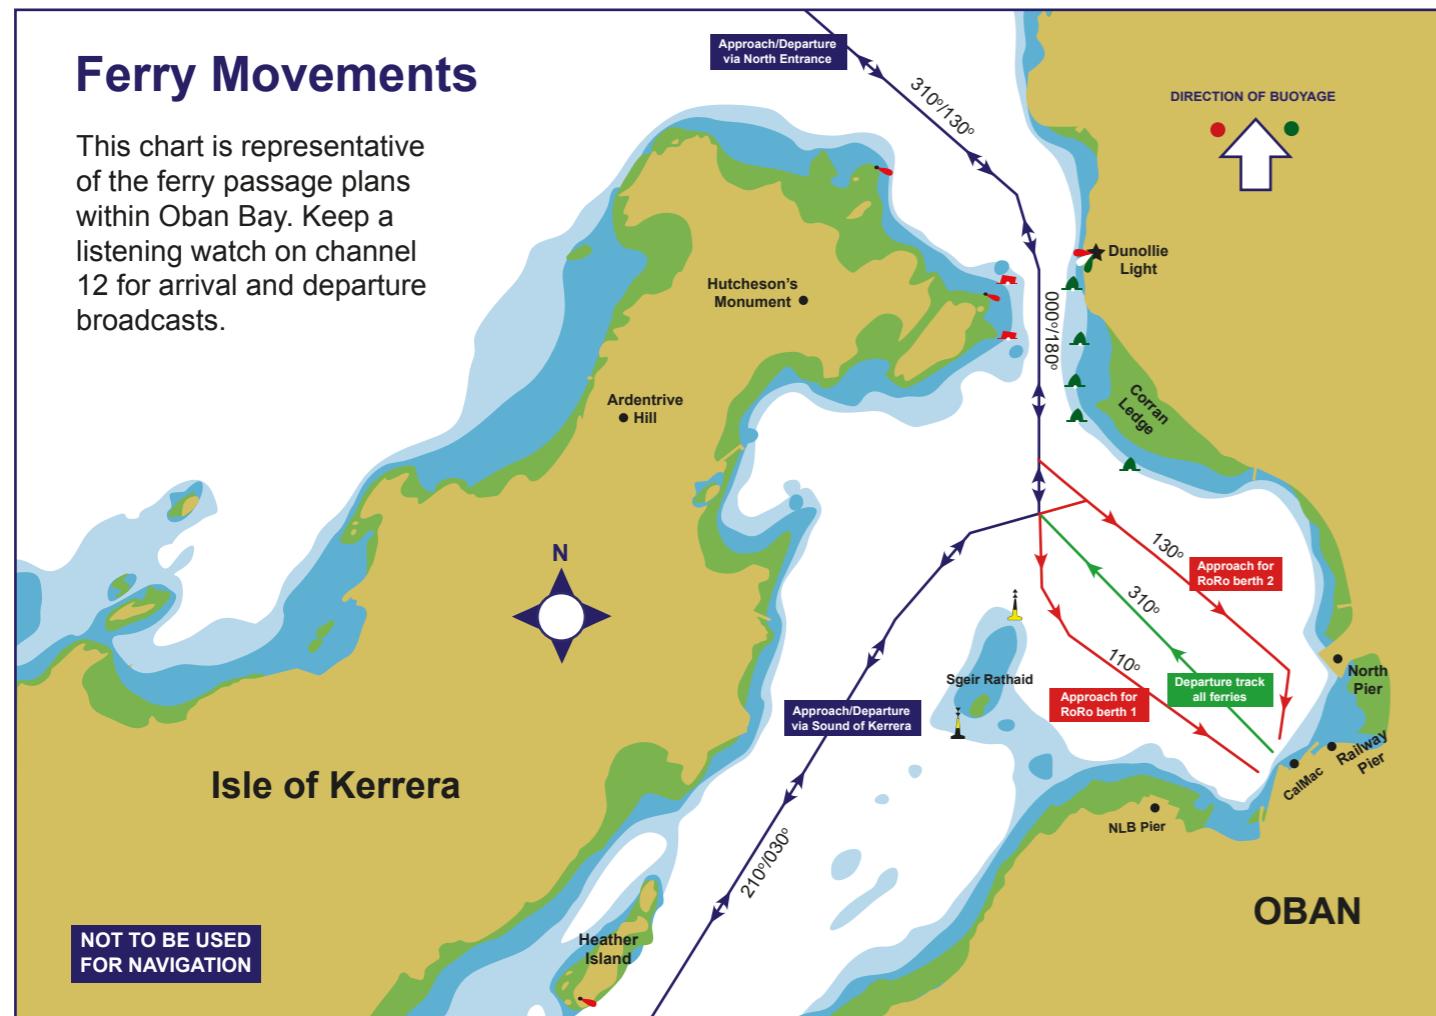

Passaging at night

Ensure your navigation lights comply with the COLREGS and can be seen. Be aware that the background lighting of Oban bay itself can cause distraction. It also makes masthead lights difficult to see. Deck and side mounted lights are much more obvious against the sea when observing from the height of a large vessel's bridge.

NB The buoyage is northbound at the north entrance.

Ferry Movements

This chart is representative of the ferry passage plans within Oban Bay. Keep a listening watch on channel 12 for arrival and departure broadcasts.

Kayakers and Small Craft

There are a number of launching points in and around Oban bay. Please be considerate with your parking and make sure someone on shore knows where you are going and when you will be back.

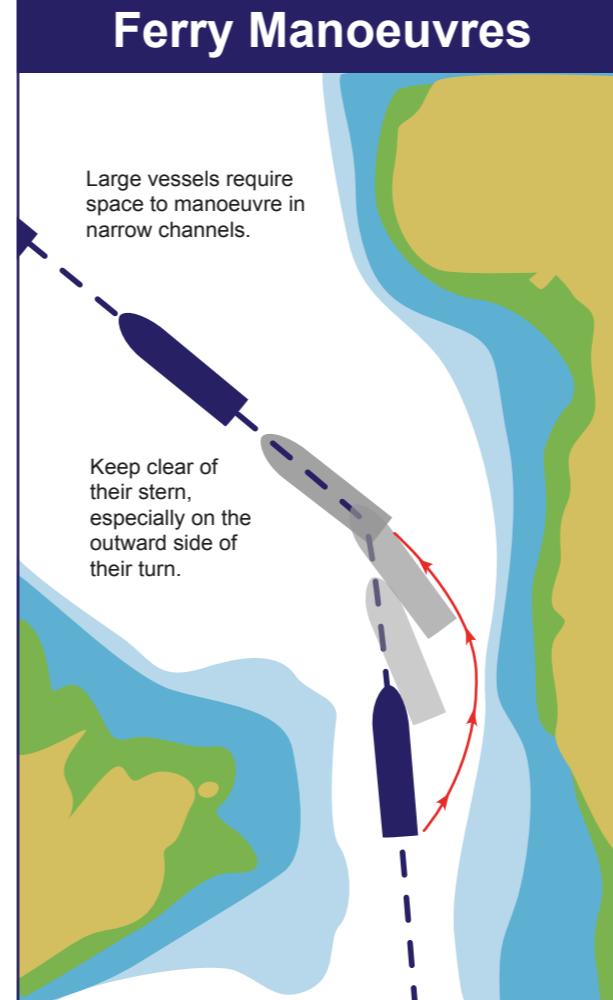

Be Safe, Be Seen Very small vessels such as kayaks, paddleboards and inflatables should make every effort to ensure that they are easily visible from the bridge of large vessels by use of brightly coloured clothing and lights when appropriate – attention is drawn to the 'Be Safe – Be Seen' guidance available from the website www.obanharbour.scot.

Crossing Take the shortest, safest route available. Stay together and don't hang around in the main channel. Keep a listening watch on channel 16 and 12 for large vessel movements.

North Pier Pontoons The outer breakwater of the pontoons can cause clapotic (standing) waves, take care.

Ferry Manoeuvres

Sound Signals

- Turning to starboard
- Turning to port
- Operating astern propulsion
- Unsure of your intentions

Incident Reporting

We hope that you make safe passage and enjoy your visit, however should you be involved in or witness an incident or near miss please report it online at www.obanharbour.scot

This guide has been produced to aid the safe navigation of Oban bay, it has not been designed as a navigational aid alone and should be used in conjunction with other navigational means.
